Cheatsheet

Continuation Patterns:

This section illustrates six continuation patterns. Each pattern shows a short-term consolidation phase followed by a continuation of the previous trend. The patterns are:

- Bullish Flag Pattern:** A sharp upward move followed by a short-term consolidation with a flat top and a slightly downward-sloping bottom, then a continuation of the upward trend.
- Bullish Pennant Pattern:** A sharp upward move followed by a symmetrical, narrow consolidation (a pennant), then a continuation of the upward trend.
- Bullish Falling Wedge:** A sharp upward move followed by a consolidation where both the top and bottom lines trend downwards, then a continuation of the upward trend.
- Bearish Flag Pattern:** A sharp downward move followed by a short-term consolidation with a flat bottom and a slightly upward-sloping top, then a continuation of the downward trend.
- Bearish Pennant Pattern:** A sharp downward move followed by a symmetrical, narrow consolidation (a pennant), then a continuation of the downward trend.
- Bearish Rising Wedge:** A sharp downward move followed by a consolidation where both the top and bottom lines trend upwards, then a continuation of the downward trend.

Reversal Patterns:

This section illustrates eight reversal patterns. Each pattern shows a trend that is likely to end and reverse. The patterns are:

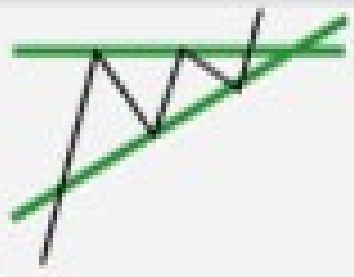

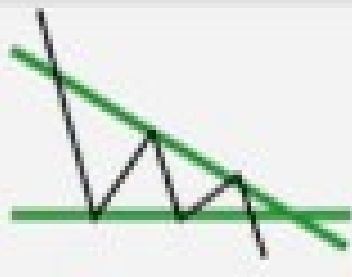

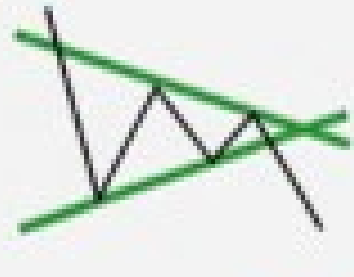

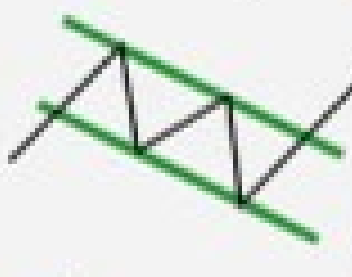

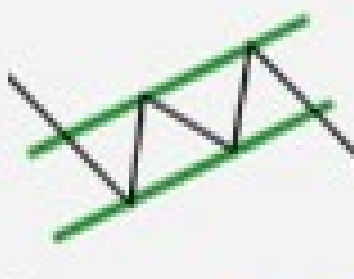

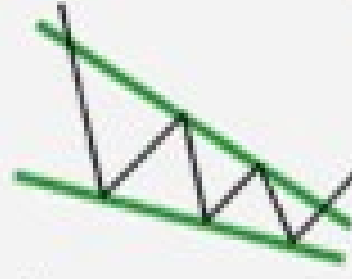

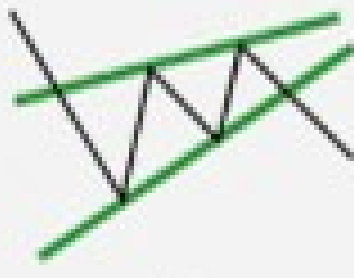

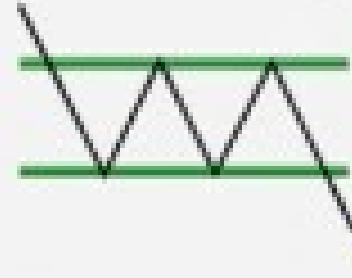

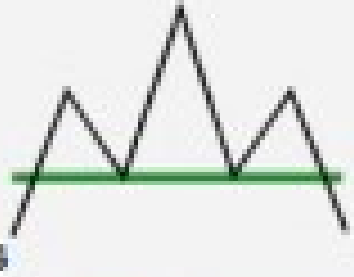

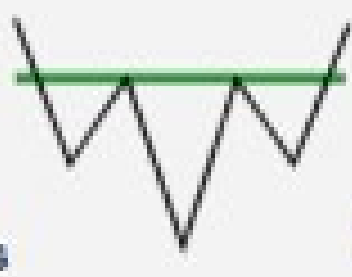

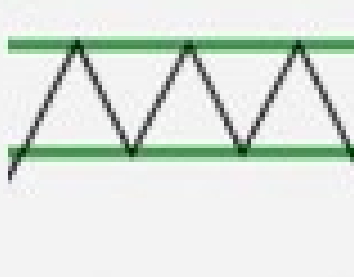

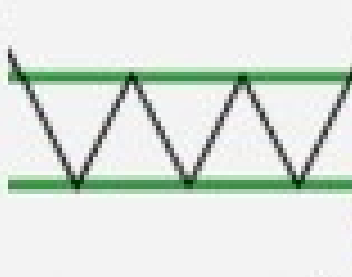

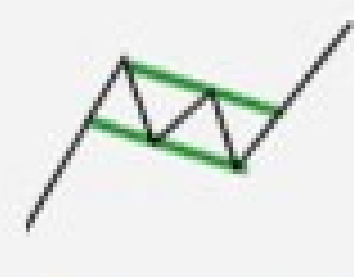

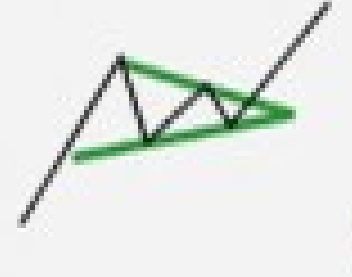

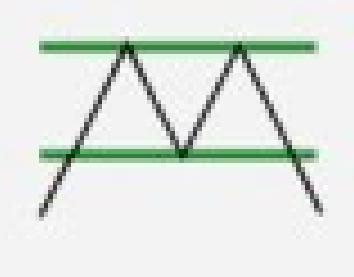

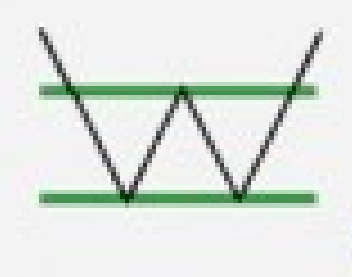

- Bearish Double Top:** Two consecutive peaks at approximately the same level, with a downward trend following the second peak.
- Bearish Head and Shoulders:** A central peak (head) higher than two side peaks (shoulders), followed by a downward trend.
- Bearish Rising Wedge:** A consolidation where both the top and bottom lines trend upwards, followed by a downward trend.
- Bullish Double Bottom:** Two consecutive troughs at approximately the same level, with an upward trend following the second trough.
- Bullish Inverted Head and Shoulders:** A central trough (head) lower than two side troughs (shoulders), followed by an upward trend.
- Bullish Falling Wedge:** A consolidation where both the top and bottom lines trend downwards, followed by an upward trend.
- Bearish Expanding Triangle:** A consolidation where both the top and bottom lines trend downwards, but the top line trends down more steeply than the bottom line, followed by a downward trend.
- Bearish Triple Top:** Three consecutive peaks at approximately the same level, followed by a downward trend.
- Bullish Expanding Triangle:** A consolidation where both the top and bottom lines trend upwards, but the top line trends up more steeply than the bottom line, followed by an upward trend.
- Bullish Triple Bottom:** Three consecutive troughs at approximately the same level, followed by an upward trend.

Neutral Patterns:

This section illustrates four neutral patterns. These patterns do not indicate a clear trend direction. The patterns are:

- Ascending Triangle:** A consolidation where the top line is horizontal and the bottom line trends upwards, followed by an upward trend.
- Descending Triangle:** A consolidation where the bottom line is horizontal and the top line trends downwards, followed by a downward trend.
- Symmetrical Triangle:** A consolidation where both the top and bottom lines trend towards each other from opposite directions, followed by a sharp move in either direction.
- Symmetrical Expanding Triangle:** A consolidation where both the top and bottom lines trend away from each other from opposite directions, followed by a sharp move in either direction.

Double Top

What Is a Double Top? A double top is an extremely bearish technical reversal pattern that forms after an asset reaches a high price two consecutive times with a moderate decline between the two highs. It is confirmed once the asset's price falls below a support level equal to the low between the two prior highs.

Double Bottom

The double bottom pattern is a bullish reversal pattern that occurs at the bottom of a downtrend and signals that the sellers, who were in control of the price action so far, are losing momentum. The pattern resembles the letter "W" due to the two-touched low and a change in the trend direction from a downtrend to an uptrend.

Tripl Top

TRIPLE TOP

The triple top pattern occurs when the price of an asset creates three peaks at nearly the same price level. The area of the peaks is resistance. The pullbacks between the peaks are called the swing lows.

Tripl Bottom

A triple bottom is a visual pattern that shows the buyers (bulls) taking control of the price action from the sellers (bears). A triple bottom is generally seen as three roughly equal lows bouncing off support followed by the price action breaching resistance.
